Resume

I am a second year engineering student, specializing in artificial intelligence, passionate about computer science and mathematics. I plan to use my theoretical knowledge to apply it to problem solving and work on interesting projects.

Education

- Currently **The National School of Computing and Systems Analysis** ENSIAS Rabat Al Irfane
Artificial Intelligence Engineering (2IA)
- 2017 – 2019 **Preparatory classes** Al Khansaa Casablanca
Option MP
- 2016 – 2017 **Baccalaureate** High school Imam Ghazali Sidi Bennour
Option mathematic science (A)

PROJETS

- 2020 **Snubby Land** Game
Game development with 4 options, individual play, play between 2 people and play against the machine. Implementation of artificial intelligence according to a simulation principle of the physical phenomenon and the Dijkstra algorithm. Online mode is established with the help of a server that allows players to connect. Using the cpp programming language
- 2019 – 2020 **Intelligent robot** Game
Development of a game to move one of the shapes from one area to another area. Use of programming language c and SDL2 as graphical interface library.
- 2019 **The traveling salesman's problem** Application
Use of geometric mathematics. Use of the Python programming language.
